

OVRYDE / THE 10-SLIDE PITCH

Your Web3 arena. Your brand. Connected by Ovryde.

A branded esports and prediction-market integration offer for crypto-native operators. Ovryde connects Hybrid Arena, identity, agents and payment infrastructure into one product experience.

01 / WHAT THE PRODUCT DOES

Turn events into participation.

Connect the competition, the audience and the economics around one shared event record.

01 Match room

02 Spectator

03 Arena Moments

04 Creator revenue

05 Arena Proof

RESUMED FEED

0 EVENTS

Start with the action.

Follow the score, player statistics, and event sequence. The shared demo clock is controlled by an authorized presenter; a scheduled or paused match may have no events yet.

SERVER → EVIDENCE

Waiting for the first authenticated match event...

- 01

Experience

Match views, spectator participation and event-based Moments.
- 02

Economics

Outcome pricing, exposure and creator-revenue projections.
- 03

Evidence

Portable records that make each result inspectable.

02 / BUILT FOR CRYPTO-NATIVE OPERATORS

Own the experience. Connect the economy.

For competition platforms, creator networks and Web3 communities building under their own brand.

Your brand

A customer experience shaped around your audience, not a third-party theme.

Your operating model

Self-hosted components and explicit identity, permission and payment boundaries.

Verifiable outcomes

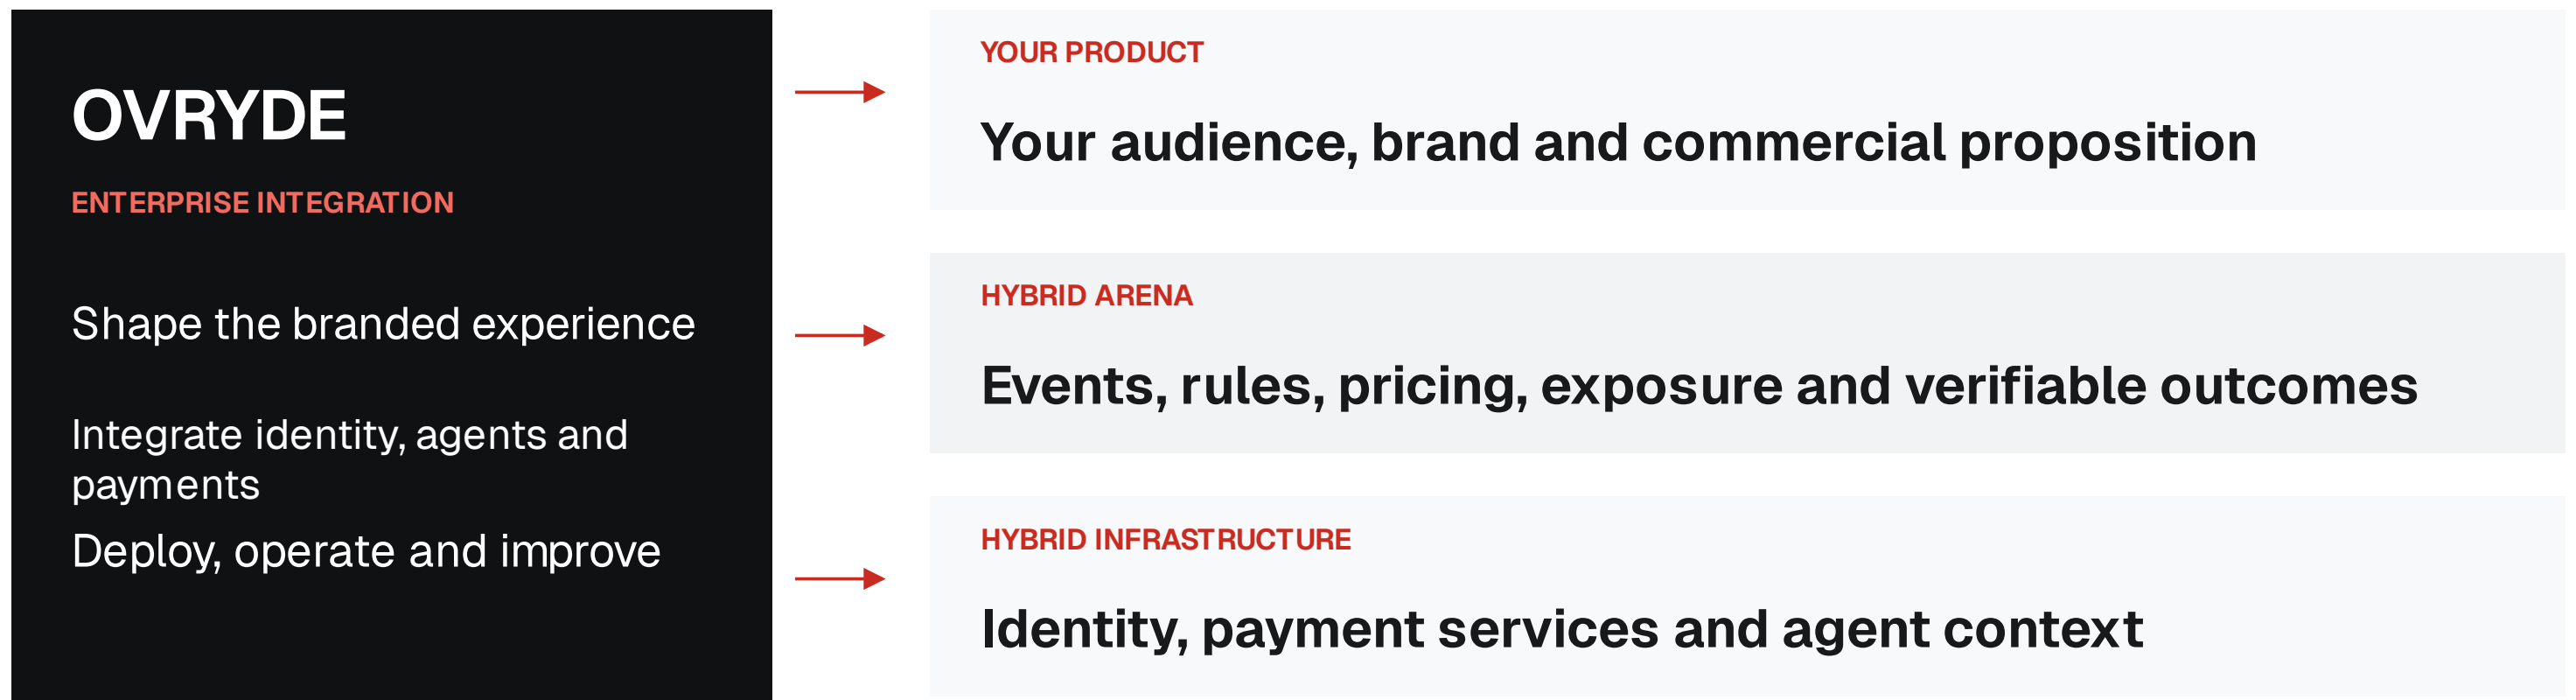

Connect participation and economic projections to the evidence behind them.

One connected product, from the audience experience to the operator view.

03 / WHY OVRYDE + HYBRID

One partner to connect it. A shared foundation to build on.

Ovryde turns the technology into your product, with implementation and ongoing support in one relationship.

04 / SELF-HOSTED BY DESIGN

Your deployment.

A brand-neutral technical core.

Separate the customer experience from the engine, and keep privileged operations behind your server boundary.

BRANDED EXPERIENCE

Your domain, interface, content and customer journeys

**TYPED CLIENT SDK**

A reusable TypeScript contract, independent of the website theme

**PRIVATE ENGINE**

Rust service with versioned APIs and retained operational records

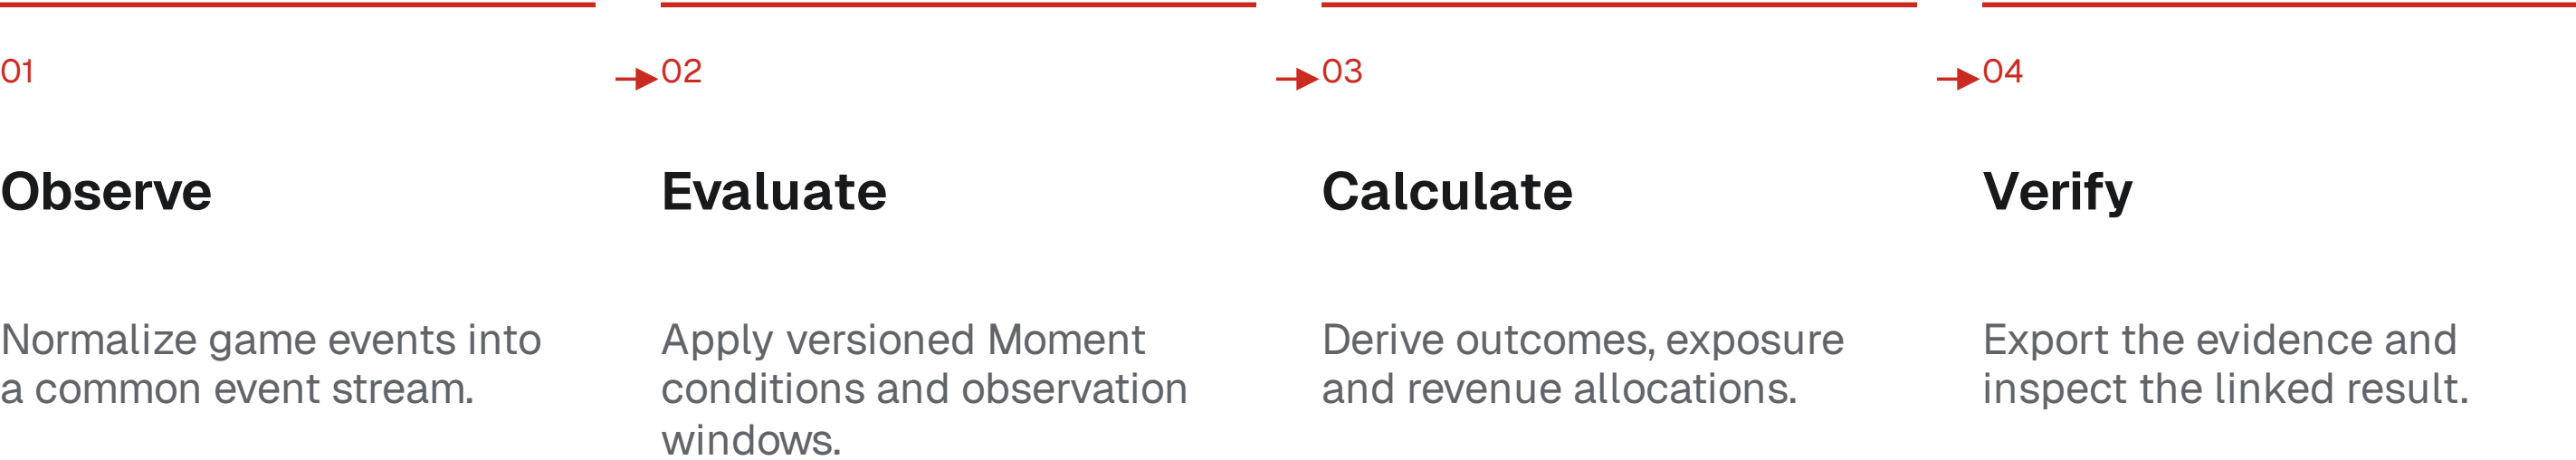

**CONNECTED SERVICES**

Explicit integrations for identity, custody, payments and proof

05 / SELF-EXECUTING RULES

Define the rules. Let the engine do the work.

Automate event evaluation and deterministic calculations, with a record that explains the result.

Automation for the workflow. Explicit authorization for actions that move value.

06 / PERFORMANCE + SECURITY ARCHITECTURE

Built for responsive experiences. Designed for controlled execution.

Concrete engineering choices behind the performance and security proposition.

PERFORMANCE FOUNDATION

A Rust-native event engine

Rust, Axum and asynchronous Tokio processing.

Typed APIs and shared state across product views.

Deterministic pricing and exposure calculations.

SECURITY CONTROLS

Authority stays explicit

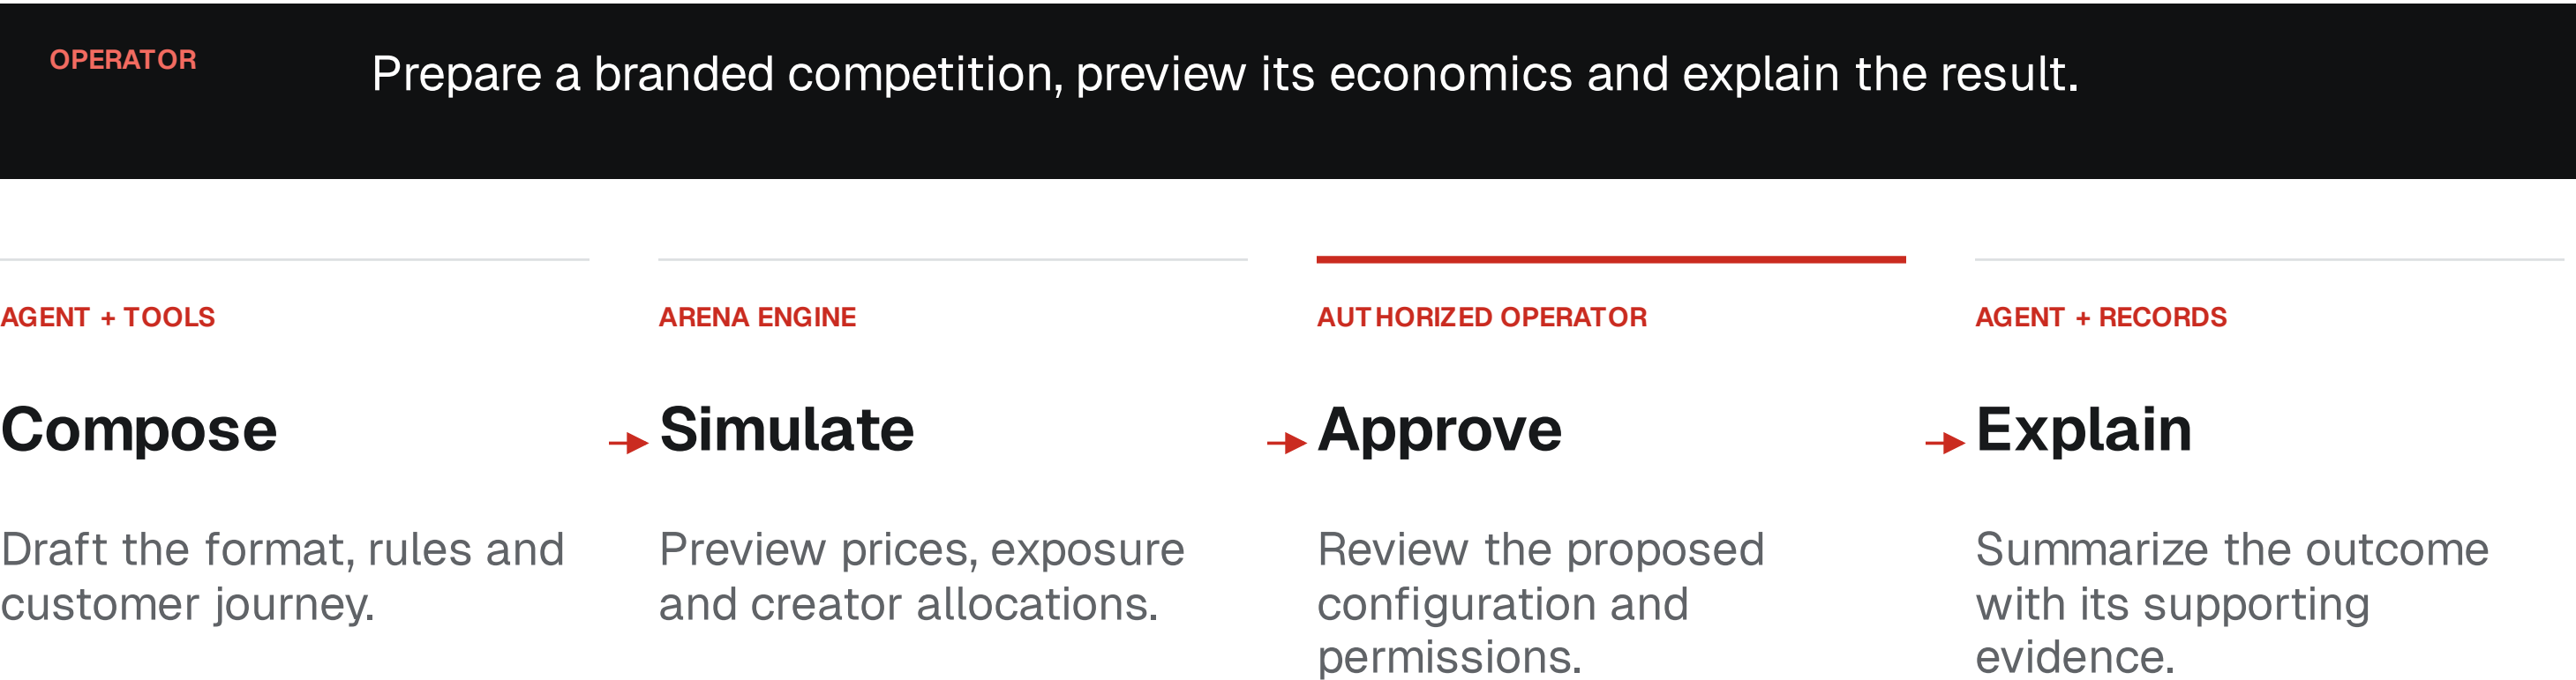

Signed requests and replay protection.

Capability-scoped access and bounded exposure.

Evidence links and independently checked proof.

From a brief to a prepared workflow.

An agent-assisted operating experience, connected to tools and authoritative engine results.

08 / HYBRID PAYMENT INFRASTRUCTURE

Connect the product to the movement of value.

Ovryde integrates the payment path that fits the use case, with consent and reconciliation kept explicit.

COMMERCE / CUSTOMER PURCHASE

Request

Payment link or checkout

→ **Confirm**

Provider response and callbacks

→ **Reconcile**

Order and payment record

ARENA / NATIVE FUNDING

Prepare

Customer-bound funding instruction

→ **Authorize**

Consent and native/MPC signing

→ **Reconcile**

Authoritative Hybrid Core result

09 / START WITH OVRYDE

See it today. Build your arena with Ovryde.

Explore the working demonstration. Bring your brand, audience and operating model. Ovryde scopes the integration and takes it through deployment and support.

A demonstrable foundation.
A concrete path to your first pilot.
